

Appl. No. 10/136,001
Reply to Office Action of 11/30/2005
Attorney Docket No. : 6045-006

DRAFT

Amendments to the Abstract

Applicant has amended the abstract according the Examiner's suggestions.

Amended Abstract

~~The disclosed device~~ is a food transporting device that enables food transport for cooking with limited spillage and reduces actual, direct contact between user and food objects. The ~~disclosed~~ food transporting device comprises a flat base, a rounded end for gripping, and a pair of sidewalls attached to a side of the flat base and extending perpendicularly upward therefrom, the flat base, rounded end and pair of sidewalls defining a holding volume for holding food objects for transport with minimal spillage.

New Abstract

A food transporting device that enables food transport for cooking with limited spillage reduces actual, direct contact between user and food objects. The food transporting device comprises a flat base, a rounded end for gripping, and a pair of sidewalls attached to a side of the flat base and extending perpendicularly upward therefrom, the flat base, rounded end and pair of sidewalls defining a holding volume for holding food objects for transport with minimal spillage.
